UZMANĪBU! IZLASIET, PIRMS POLIKARBONĀTA GRIEŠANAS

Tālāk tekstā ir sniegta polikarbonāta lokšņu griešanas shēma. Katrs attēls attiecas tikai uz vienu konkrētu siltumnīcas izmēru. Siltumnīcas montāža sākas ar polikarbonāta griešanu.

1. Salīdziniet shēmu: pirms griešanas pārbaudiet siltumnīcas izmērus un atrodiet shēmu ar tieši tādiem pašiem izmēriem. Griešana pēc citas shēmas izraisīs neatgriezenisku lokšņu bojājumu — nepietiks materiāla montāžas pabeigšanai.

2. Siltumnīcas ar izmēriem 2,1 × 8 m un lielākas: papildus **4 polikarbonāta loksnēm ar izmēriem 2,1 × 5,1 m** komplektā ietilpst vēl **1 vai vairākas polikarbonāta loksnes ar izmēriem 2,1 × 6 m** (skaits atkarīgs no siltumnīcas garuma). **2,1 × 6 m** lokšņu piegriešanas princips ir vienāds visiem šiem izmēriem, tādēļ griešanas shēma paliek identiska.

3. Mēriet precīzi un grieziet pa kārtām: precīzi nomēriet un atzīmējiet katru griešanas līniju. Grieziet tikai pēc tam, kad esat vēlreiz pārbaudījuši izmērus. **Negrieziet visas loksnes vienlaikus** — veiciet griezumus pa vienam, saskaņā ar numerāciju shēmā.

Ražotājs neuzņemas atbildību par materiāla trūkumu, kas radies, ja griešana netika veikta pēc shēmas.
